

# CONNECT BACKCOUNTRY HARNESS

INSPIRED BY NATURE // DRIVEN BY THE ELEMENTS // FLYOZONE.COM

OZONEKITES

## THE CONNECT BACKCOUNTRY HARNESS HAS BEEN DESIGNED FOR COMFORT AND SUPPORT WHILE REMAINING CLEAN, SIMPLE AND LIGHTWEIGHT.

This comfortable waist harness with leg straps is ideal for experienced backcountry snowkiters venturing deep into mountains, or riders looking for a lightweight comfortable fit alternative to the classic spreader bar system. The Connect Backcountry has been designed like a rock climbing harness so that it will not ride up.

### WEBBING CHICKEN LOOP CONNECTION

Heavy duty webbing loop to connect the chicken loop, reducing size and weight of the harness. Three step connection - release chicken loop, feed loop through webbing, reload chicken loop.

### ERGONOMIC SHAPING

Increased support through wider and improved ergonomic shaped panelling. The load is distributed evenly over a larger area.

### STRONG INTERNAL STRUCTURE

Plastic layers along the back section with full length webbing support for ideal load distribution and extra strength.

### KITE LEASH ATTACHMENT

Easy to access front kite leash attachment.

### WEBBING LOOP ATTACHMENTS

Attach a grab handle or ropes for pulling sledges to the webbing loops on each side of the harness.

### LEG SUPPORT STRAPS

Color coded, thin and light yet comfortable leg straps with neoprene lining for a strong grip/hold on winter clothing. The leg straps are connected at an ergonomic angle distributing vertical loads between the attachment point and leg padding.

### COMFORT GRIP FIT

Extra padded areas for increased comfort and neoprene lining for a strong grip/hold on winter clothing. It also protects better against the cold.

### LIGHTWEIGHT CONSTRUCTION

Strong yet lightweight construction for backcountry touring – weighs only 700grams!

### TECHNICAL BACKPACK CONNECTION

Female buckles on each side connect directly with Frenzy and Summit technical backpacks. Simply unclip the waist strap from the backpack, remove it and click the bag straps into the harness.

### ONE SIZE FITS ALL

Fully adjustable to fit all shapes and sizes, both under or over clothing and outer winter layers.
