

CONNECT PRO HARNESS

INSPIRED BY NATURE // DRIVEN BY THE ELEMENTS // FLYOZONE.COM

OZONEKITES

THE CONNECT PRO HARNESS IS IDEAL FOR ALL SNOW OR LAND KITERS WITH THE ADDED SUPPORT AND EASE OF USE OF A STAINLESS STEEL SPREADER BAR. THIS COMFORTABLE WAIST HARNESS INCLUDES REMOVABLE LEG STRAPS MAKING IT A VERY UNIVERSAL HARNESS ON THE SNOW OR LAND.

Designed for comfort, support and flexibility in use, this harness is perfect to wear over or under your snow gear. Featuring high quality Aluminium adjustment buckles on the spreader bar and leg straps. The Connect Pro has been designed like a rock climbing harness so that it will not ride up.

SPREADER BAR

The Stainless Steel spreader bar attaches directly to both the harness and the leg straps reducing spreader bar upward tilt. Extra padding and neoprene covered for comfort.

ALUMINIUM BUCKLES

High quality extra strong aluminium adjustment buckles are easy to open and close. This makes fitting on the harness very easy even under snow gear. Smooth adjustment reduces wear on webbing.

STRONG INTERNAL STRUCTURE

Plastic layers along the back section with full length webbing support for ideal load distribution and extra strength.

REMOVABLE LEG SUPPORT STRAPS

Color coded, thin and light yet comfortable leg straps with neoprene lining for a strong grip/hold on winter clothing. The leg straps are connected at an ergonomic angle distributing vertical loads between the attachment point and leg padding. They can be easily removed or fitted under your snow pants without having to take them off.

ERGONOMIC SHAPING

Increased support through wider and improved ergonomic shaped panelling. The load is distributed evenly over a larger area.

COMFORT GRIP FIT

Extra padded areas for increased comfort and neoprene lining for a strong grip/hold on winter clothing. It also protects better against the cold.

TECHNICAL BACKPACK CONNECTION

Female buckles on each side connect directly with Frenzy and Summit technical backpacks. Simply unclip the waist strap from the backpack, remove it and click the bag straps into the harness.

KITE LEASH ATTACHMENT

Easy to access front kite leash attachment.

WEBBING LOOP ATTACHMENTS

Attach a grab handle or ropes for pulling sledges to the webbing loops on each side of the harness.

ONE SIZE FITS ALL

Fully adjustable to fit all shapes and sizes, both under or over clothing and outer winter layers.

- **WAIST HARNESS WITH REMOVABLE LEG STRAPS**
- **IDEAL FOR ALL SNOW AND LAND KITERS**
- **STRONG YET LIGHTWEIGHT CONSTRUCTION**
- **STAINLESS STEEL SPREADER BAR WITH COMFORTABLE SPREADER PAD**
