

INFINITY V3

PERFORMANCE LIGHTWIND

OZONE®

INFINITY^{V3}

The Infinity uniquely blends a classic twin-tip freeride feeling with impressive light wind performance making riding in a breeze more exciting and progressive.

Alive with speed and maneuverability, the Infinity redefines what we think of as a light wind board.

HYBRID BIAX FIBERGLASS AND UD CARBON BEAM

The third version of the Infinity features a new hybrid Biax Fiberglass and UD Carbon Beam layup.

This new construction reduces weight, increases flex at the tips and increases response from the center of the board, making for a smoother ride in chop with improved comfort in landings and carving turns.

UD || CARBON BEAM

HYBRID FREERIDE-LIGHT WIND OUTLINE

It is livelier, lighter and smaller than other light wind specific boards – the Infinity motivates progression! It has range too; as the wind increases the Infinity remains smooth and controllable to ride thanks to its unique hybrid freeride-light wind outline.

CONTINUOUS BOARD SPEED

The double concave bottom shape going flat towards channeled tips and optimized rocker line provides early planning, continuous board speed through lulls and impressive upwind performance.

OFF CENTERED INSERTS

Off centred inserts relieve stress on ankles while edging to ride upwind, this also allows for an easy load and pop in light breezes.

TEAR IT UP!

Ideally suited for twin-tip riders who want simply to cruise, freeriders searching for high end light wind performance, all the way to freestyle addicts aspiring to throw unhooked tricks in a breeze.

Don't find yourself sitting in desperation on the beach, take the Infinity and tear it up!

FOOTPADS AND STRAPS V2

Having comfortable footpads and straps can be the difference between a good session and a bad one. Our V2 design provides the ultimate balance between performance and comfort to keep the good sessions rolling!

Our foot straps are ergonomically designed featuring Ultralon Performance Foam® and plush neoprene for the ultimate in comfort and control while providing a precise fit. Ultralon foam has an exceptional resistance to packing out, it doesn't compress over time and has an outstanding formability enabling anatomical adaptation. Combined with the quick and easy velcro size adjustment, the strap provides a snug fit to all foot shapes and sizes or wetsuit booties.

We have designed our footpads to provide superior comfort, adaptability and strength. The multi-density foam pads combine a shock absorption base layer and a higher density top layer with precise contouring and texture for increased traction to keep your feet comfortably locked in. The baseplate is built strong with nine strap positions and five stance angle options allowing for uncompromised adaptability.

BIO-BASED EPOXY RESIN

Latest innovations in bio-based chemistry have allowed us to use a new epoxy resin which has 35% of its molecular structure derived from plant origin.

A-GRADE PAULOWNIA CORE

The premium A-grade Paulownia core provides ultimate flex characteristics, amazing strength, and reduced weight.

INFINITY ^{V3}

Range of Use:

Suggested Size & Rider Weight Range:

SIZE	WEIGHT
144 X 47 CM	65KG+
148 X 48 CM	80KG+

SIZE AND WEIGHT RANGE IS INDICATIVE ONLY BASED ON NORMAL RIDING CONDITIONS. ACTUAL RANGE WILL VARY BASED ON RIDER PREFERENCE, SKILL LEVEL AND STRENGTH OF WIND.
