

# CONNECT BACKCOUNTRY V2

**THE CONNECT BACKCOUNTRY V2 HARNESS HAS BEEN DESIGNED FOR COMFORT AND SUPPORT WHILE REMAINING CLEAN, SIMPLE AND LIGHTWEIGHT. THE SECOND VERSION HAS MODIFICATIONS TO IMPROVE OVERALL STRENGTH AND LOAD DISTRIBUTION.**

- **WAIST HARNESS WITH LEG STRAPS - IDEAL FOR ALL SNOW AND LAND KITERS**
- **STRONG YET LIGHTWEIGHT CONSTRUCTION FOR BACKCOUNTRY TOURING**
- **HEAVY DUTY WEBBING LOOP CONNECTION FOR THE QUICK RELEASE**
- **ERGONOMIC SHAPING AND ENHANCED LOAD DISTRIBUTION**
- **FULLY ADJUSTABLE - ONE SIZE FITS ALL**

This comfortable waist harness with leg straps is ideal for experienced backcountry snowkiters venturing deep into mountains, or riders looking for a lightweight alternative to the classic spreader bar system. The Connect Backcountry V2 has been designed similar to a rock climbing harness so that it will not ride up.

# FIT OVER OUTER LAYERS

# TECHNICAL BACKPACK CONNECTION

# CONNECT BACKCOUNTRY<sup>v2</sup> FEATURES

**WEBBING LOOP CONNECTION FOR QUICK RELEASE** Heavy duty webbing loop to connect the Quick Release, reducing size and weight of the harness. Three step connection - open Quick Release, feed loop through webbing, reload Quick Release.

**ERGONOMIC SHAPING** Increased support through wider and improved ergonomic shaped panelling. The load is distributed evenly over a larger area.

**STRONG INTERNAL STRUCTURE** Plastic layers along the back section with full length webbing support for ideal load distribution and extra strength.

**LEG SUPPORT STRAPS** Color coded, lightweight and comfortable leg straps with neoprene lining for a strong grip/hold on winter clothing. The leg straps are connected at an ergonomic angle distributing vertical loads between the attachment point and leg padding.

**TECHNICAL BACKPACK CONNECTION** Female buckles on each side connect directly with our Snowkite technical backpacks. Simply unclip the waist strap from the backpack, remove it and click the bag straps into the harness.

**COMFORT GRIP FIT** Extra padded areas for increased comfort and neoprene lining for a strong grip/hold on winter clothing. It also protects better against the cold.

**LIGHTWEIGHT CONSTRUCTION** Strong yet lightweight construction for backcountry touring - weighs only 700grams!

**KITE LEASH ATTACHMENT** Easy to access front kite leash attachment.

**WEBBING LOOP ATTACHMENTS** Attach a grab handle or ropes for pulling sleds to the webbing loops on each side of the harness.
