- **FULLY ADJUSTABLE - ONE SIZE FITS ALL**

COMFORT GRIP FIT      ERGONOMIC SHAPING

# FIT OVER OUTER LAYERS

# FIT UNDER OUTER LAYERS

# CONNECT PRO<sub>v2</sub> FEATURES

## STAINLESS STEEL SPREADER BAR

The Spreader Bar attaches directly to both the harness and the leg straps reducing spreader bar upward tilt. Extra padding and neoprene covered for comfort.

## ALUMINIUM BUCKLES

High quality extra strong aluminium adjustment buckles are easy to open and close. This makes fitting on the harness very easy even under snow gear. Smooth adjustment reduces wear on webbing.

## ERGONOMIC SHAPING

Increased support through wider and improved ergonomic shaped panelling. The load is distributed evenly over a larger area.

## STRONG INTERNAL STRUCTURE

Plastic layers along the back section with full length webbing support for ideal load distribution and extra strength.

## TECHNICAL BACKPACK CONNECTION

Female buckles on each side connect directly with our Snowkite technical backpacks. Simply unclip the waist strap from the backpack, remove it and click the bag straps into the harness.

## REMOVABLE LEG SUPPORT STRAPS

Color coded, lightweight and comfortable leg straps with neoprene lining for a strong grip/hold on winter clothing. The leg straps are connected at an ergonomic angle distributing vertical loads between the attachment point and leg padding. They can be easily removed or fitted under your snow pants without having to take them off.

## COMFORT GRIP FIT

Extra padded areas for increased comfort and neoprene lining for a strong grip/hold on winter clothing. It also protects better against the cold.

## KITE LEASH ATTACHMENT

Easy to access front kite leash attachment.

## WEBBING LOOP ATTACHMENTS

Attach a grab handle or ropes for pulling sleds to the webbing loops on each side of the harness.
