

CONTACT WATER CONTROL SYSTEM

THE CONTACT-WATER CONTROL SYSTEM OFFERS THE LATEST IN RELEASE FEATURES, A CLEAN CONTROL BAR DESIGN AND A SIMPLE EASY-TO-USE TRIMMING SYSTEM.

PUSH AWAY QUICK RELEASE

The control system features our Megatron push-away quick release with total flag out of the kite. The release handle is ergonomic with positive release forces for quick and easy release. Simple re-assembly saves time and gets you back up and riding faster.

TWO RELEASE MODES

The Megatron offers riders a choice of two release modes, the recommended Standard or the optional Expert mode.

- Standard mode offers 100% flag out in all situations by releasing the Megatron or letting go of the bar when un-hooked.
- Expert mode offers 100% flag out only when the Megatron is released whilst hooked in, allowing riders practicing whilst hooked in, letting go of the bar without releasing the kite to flag out (not recommended).

ANTI-TWIST FLAG OUT LINE AND SPINNING HANDLE

The flag out line running through the Megatron & kite leash attachment at the bottom keeps the leash tangle free when doing rotations and manually unwinding the centre lines using the Spinning Handle.

AUTO POSITIONING CHICKEN LOOP

Designed in conjunction with the bar centre piece, the Megatron spinning handle auto positions the chicken loop when unhooking.

SOFT BAR ENDS WITH LEADER LINE ADJUSTMENT

Soft bar ends for comfort and are less likely to damage lightly constructed boards. The leader lines are adjustable via knots inside the float, simply pull out from the opening to access and adjust to your preference.

LIGHT WEIGHT ALUMINIUM CENTRE PIECE

The new Aluminium centre piece reduces weight and the low friction design reduces wear.

PU COVERED DE-POWER LINE

The tough PU covered de-power line significantly reduces wear when sheeting in and out.

CLAMCLEAT TRIMMER

Anodized low abrasion Clamcleat trimmer.

BUNGEE TRIM LINE & MAGNETIC HANDLE

The internal bungee with magnetic handle connects to a magnetic neoprene sock covering the clam cleat to reduce tangles when the trimmer is de-powered.

RE-LAUNCH BALLS

Fixed to the leader lines to pull when re-launching the kite.

FLYING LINES

Colour coded 500kg front / 300kg back lines using the highest quality Dyneema available.

ERGONOMIC EVA GRIP

A new 3D pressed EVA grip with ergonomic shaping provides the ultimate bar grip.

The Contact-Water Control System bar sizes come in 38cm, 45cm, 50cm and 55cm. The larger size PU chicken loop (sold separately) is perfect for riders with longer arms or requiring even easier hooking in & out.
