# Infinity<sup>V2</sup>

PERFORMANCE LIGHTWIND

INSPIRED BY NATURE  DRIVEN BY THE ELEMENTS

OZONE®

# Infinity<sup>v2</sup>

DESIGN:

# OZONE<sup>®</sup>

## Performance Lightwind

The Infinity uniquely blends a classic twin-tip freeride feeling with impressive light wind performance making riding in a breeze more exciting and progressive.

# Infinity<sup>v2</sup>

DESIGN:

# OZONE<sup>®</sup>

- Performance Lightwind
- Classic twin-tip feeling
- Impressive upwind drive
- All rider levels

## Redfining Light Wind Boards

Alive with speed and maneuverability, the Infinity redefines what we think of as a light wind board. It is livelier, lighter and smaller than other light wind specific boards - the Infinity motivates progression! It has range too; as the wind increases the Infinity remains smooth and controllable to ride thanks to its unique hybrid freeride-light wind outline.

### Range of use:

# Infinity<sup>v2</sup>

DESIGN:

# OZONE<sup>®</sup>

## Updated 3D Shaping

The Infinity V2 features updated 3D shaping at the tips and refined flex patterns for a smoother rider in chop and increased comfort on landings and when carving turns. The double concave bottom shape going flat towards channeled tips and optimized rocker line provides early planning, continuous board speed through lulls and impressive upwind performance.

## Off Centered Inserts

Off centered inserts relieve stress on ankles while edging to ride upwind, this also allows for an easy load and pop in light breezes.

## Suggested Size & Rider Weight Range:

Size	Weight
• 144 X 47 CM	65KG +
• 148 X 48 CM	80KG +

## Hybrid Freeride-Light Wind Outline

Alive with speed and maneuverability, the Infinity redefines what we think of as a light wind board. It is livelier, lighter and smaller than other light wind specific boards - the Infinity motivates progression! It has range too; as the wind increases the Infinity remains smooth and controllable to ride thanks to its unique hybrid freeride-light wind outline.

## Double Concave & Tip Channels

The double concave bottom shape going flat towards channeled tips and optimized rocker line provides early planning, continuous board speed through lulls and impressive upwind performance..

**1: The Premium A-grade Paulownia core** provides ultimate flex characteristics, amazing strength, and reduced weight.

**2: Highest Quality Fiberglass.** Precise lamination using high quality Biaxial and UD fiberglass layers to provide the ultimate balance of flex, response and strength.

**3: Highest quality 316 Stainless Steel inserts** embedded into high strength polymer blocks. This insert construction offers superior strength for powered riding and using boots. **Off Centered Inserts** relieve stress on ankles when edging to ride upwind, this also allows for an easy load and pop in light breezes.

**4: Grab Recesses** on both rails if riding without a handle.

**5: Fins V2** Two fin designs offer the choice for solid edge hold or increased freedom.

## Exceptional Ozone Factory Construction

World-class construction in our own factory, using the highest quality materials and hand checked Quality Control at every step. The Ozone factory also manufactures our Paragliding and Speed Wing range; the same Quality Control processes are used across all products.

## Footpads and Straps V2

Having comfortable footpads and straps can be the difference between a good session and a bad one. Our V2 design provides the ultimate balance between performance and comfort to keep the good sessions rolling!

Our foot straps are ergonomically designed featuring **Ultralon Performance Foam<sup>®</sup> and plush neoprene** for the ultimate in comfort and control while providing a precise fit. Ultralon foam has an exceptional resistance to packing out, it doesn't compress over time and has an outstanding formability enabling anatomical adaptation. Combined with the **quick and easy velcro size adjustment**, the strap provides a snug fit to all foot shapes and sizes or wetsuit booties.

We have designed our footpads to provide superior comfort, adaptability and strength. The multi-density foam pads combine a **shock absorption base layer** and a **higher density top layer** with **precise contouring and texture** for increased traction to keep your feet comfortably locked in. **The baseplate** is built strong with **nine strap positions** and **five stance angle options** allowing for uncompromised adaptability.

## Board Handle V2

Strong and durable with a textured underside grip for maximum control during water starts to board offs.

## Fins V2

Two fin designs offer the choice for solid edge hold or increased freedom. Choose the 45mm size for maximum grip while edging and taking off to boost. The 35mm size is perfect for freestyle riders using boots and for those looking for increased freedom while carving. Our V2 fins are precisely injection molded using advanced glass-filled nylon materials for high strength and wear resistance.

Ideally suited for twin-tip riders who want simply to cruise, freeriders searching for high end light wind performance, all the way to freestyle addicts aspiring to throw unhooked tricks in a breeze. Don't find yourself sitting in desperation on the beach, take the Infinity and tear it up!
