Torque^{v2}

OZONE[®]

DESIGN:

Providing un-compromised performance for Freeriders and Freestylers, the Torque V2 is ultra smooth and responsive. It delivers explosive performance with amazing grip and smooth flex to stick your landings.

Torque^{v2}

Quad Concave Hull

The Torque V2 features an updated Quad Concave Hull design enhancing tracking and pop. Refined spines running the length of the board increase edge hold in strong winds and chop, providing ultimate control and precision when loading up for jumps.

Torque^{v2}

DESIGN:

ozone[®]

Deck Shaping

New deck shaping with a progressive taper into the tips improves feeling and flex patterns, enabling a smoother take off and softer landing.

Torque^{v2}

DESIGN:

OZONE[®]

Square Tip Outline

The Square Tip Outline means more rail and board surface area in the water to load up against for an insane pop experience, whether you are boosting airs with straps or throwing unhooked moves with boots. It provides excellent edge retention and strong upwind performance.

Medium Rocker with Medium Flex

The continuous medium rocker combined with a medium all-round flex offers a smooth ride with ultimate control in heavy chop, great upwind drive, optimized pop and soft landings.

Torque^{v2}

USAGE:

SUGGESTED SIZE & RIDER WEIGHT RANGE:

SIZE	WEIGHT
• 128 X 38 CM	40-60KG
• 131 X 39 CM	45-65KG
• 134 X 40 CM	50-70KG
• 136 X 41 CM	65-85KG
• 138 X 42 CM	80-100KG
• 140 X 43 CM	95KG +

- Freeride/Freestyle performance
- Medium rocker and medium flex
- Quad concave hull for amazing control and pop
- Intermediate to advanced riders

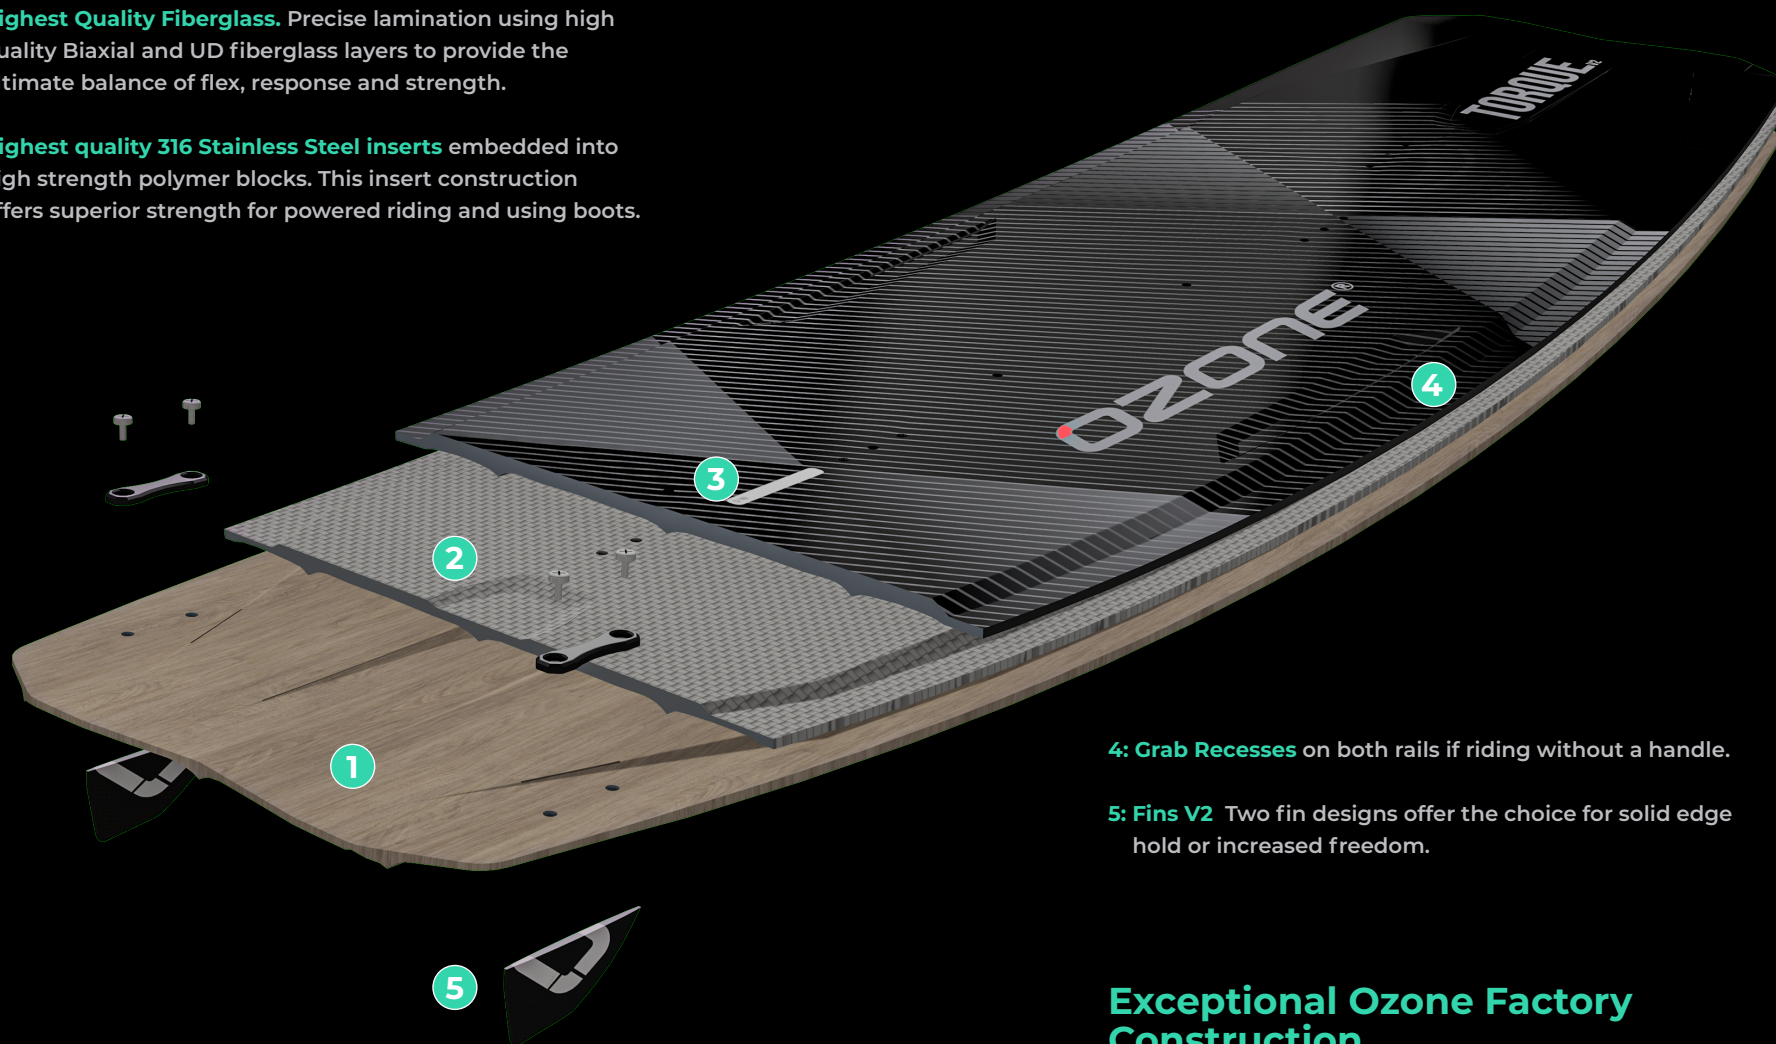

RANGE OF USE:

1: The Premium A-grade Paulownia core provides ultimate flex characteristics, amazing strength, and reduced weight.

2: Highest Quality Fiberglass. Precise lamination using high quality Biaxial and UD fiberglass layers to provide the ultimate balance of flex, response and strength.

3: Highest quality 316 Stainless Steel inserts embedded into high strength polymer blocks. This insert construction offers superior strength for powered riding and using boots.

4: Grab Recesses on both rails if riding without a handle.

5: Fins V2 Two fin designs offer the choice for solid edge hold or increased freedom.

Exceptional Ozone Factory Construction

World-class construction in our own factory, using the highest quality materials and hand checked Quality Control at every step. The Ozone factory also manufactures our Paragliding and Speed Wing range; the same Quality Control processes are used across all products.

Footpads and Straps V2

Having comfortable footpads and straps can be the difference between a good session and a bad one. Our V2 design provides the ultimate balance between performance and comfort to keep the good sessions rolling!

Our foot straps are ergonomically designed featuring **Ultralon Performance Foam®** and **plush neoprene** for the ultimate in comfort and control while providing a precise fit. Ultralon foam has an exceptional resistance to packing out, it doesn't compress over time and has an outstanding formability enabling anatomical adaptation. Combined with the **quick and easy velcro size adjustment**, the strap provides a snug fit to all foot shapes and sizes or wetsuit booties.

We have designed our footpads to provide superior comfort, adaptability and strength. The multi-density foam pads combine a **shock absorption base layer** and a **higher density top layer** with **precise contouring and texture** for increased traction to keep your feet comfortably locked in. **The baseplate** is built strong with **nine strap positions** and **five stance angle options** allowing for uncompromised adaptability.

Board Handle V2

Strong and durable with a textured underside grip for maximum control during water starts to board offs.

Fins V2

Two fin designs offer the choice for solid edge hold or increased freedom. Choose the 45mm size for maximum grip while edging and taking off to boost. The 35mm size is perfect for freestyle riders using boots and for those looking for increased freedom while carving. Our V2 fins are precisely injection molded using advanced glass-filled nylon materials for high strength and wear resistance.
