BIG AIR	●●●●●	●●●●●	●●●●●

SUGGESTED SIZE & RIDER WEIGHT RANGE

SIZE	WEIGHT
• 129 X 38 CM	40-60KG
• 132 X 39 CM	45-65KG
• 135 X 40 CM	50-70KG
• 138 X 41 CM	65-85KG
• 141 X 42 CM	80-100KG
• 144 X 43 CM	95KG +

Size and weight range is indicative only based on normal riding conditions. Actual range will vary based on rider preference, skill level and strength of wind.

THE CODE WAS OUR FIRST TWIN TIP MODEL AND HAS PROVEN TO BE AN OUTSTANDING ALL ROUND FREERIDE PERFORMANCE BOARD. NOW IN ITS SECOND VERSION OF DESIGN, THE CODE HAS BEEN FURTHER REFINED FOR INCREASED CONTROL AND UPWIND PERFORMANCE.

The Code V2 maintains the progressive outline and medium rocker of the V1, as well as the double concave bottom shape developed specifically for Intermediate to Advanced free riders. This perfected combination provides a smooth ride in choppy conditions and powerful carving performance.

New spine style channels at the tips increase edge hold and control for higher boosting and improved upwind performance. The Code V2 has amazing control in choppy water and remains ultra-smooth underfoot.

**NEW SPINE STYLE CHANNELS AT THE TIPS
INCREASE EDGE HOLD AND CONTROL FOR HIGHER
BOOSTING AND IMPROVED UPWIND PERFORMANCE**

An updated flex pattern absorbs and controls fast landings, making engaged big air and kiteloops forgiving on touch down. In overpowered conditions, the swallow tip design combined with the new channels helps the board maintain an edge allowing perfect load up for big boosts.

**I WAS VERY SURPRISED WITH THE SMOOTH CARVE
FELLING AND CONTROL IN THE OPEN SEA. CHOPPY
CONDITIONS ARE NOT A PROBLEM FOR THE NEW
CODEV2. I HAVE BEEN RIDING AND BOOSTING IN
THE MOST CHOPPY PLACES AND IT FEELS AMAZING...**

PAULINO PEREIRA

CODE_{v2} FEATURES

EXCEPTIONAL OZONE FACTORY CONSTRUCTION

World-class construction in our own factory, using the highest quality materials and hand checked Quality Control at every step. The Ozone factory also manufactures our Kites, Paragliders and Speed Wings; the same Quality Control processes are used across all products.

FREERIDE OUTLINE

The Freeride rounded-style outline provides excellent carving performance from a small to wide carving radius, plus solid high wind control and edge retention for boosting even when overpowered.

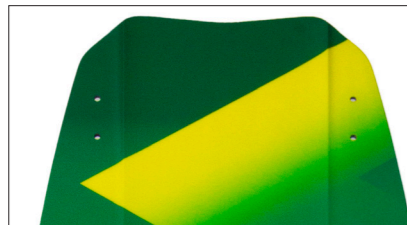

CONTINUOUS MEDIUM ROCKER WITH MEDIUM FLEX

The continuous medium rocker combined with a medium all-round flex offers a smooth ride with ultimate control in heavy chop, good upwind performance, optimized pop and soft landings.

DOUBLE CONCAVE BOTTOM SHAPE

The Double Concave transitioning to flat bottom shape provides a smooth ride in choppy conditions and powerful carving performance. New channels tapering from the flat section to the tips increase edge hold for higher boosting and increased upwind performance. This bottom shape design helps to absorb and control fast landings, making engaged big air and kitemanoeuvres forgiving on touch down.

SWALLOW TIPS

Swallow shaped tips allow a strong edge hold without the feeling of being locked on a rail, while increasing stability and control when carving. This gives a strong edge hold and positive feel when carving or loading and releasing off the water during a jump.

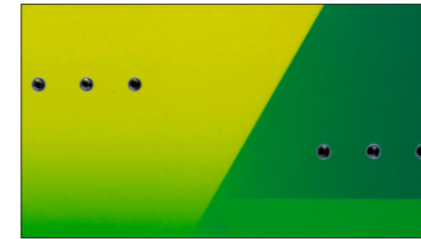

A-GRADE PAULOWNIA CORE

The premium A-grade Paulownia core provides ultimate flex characteristics, amazing strength, and reduced weight.

HIGHEST QUALITY FIBERGLASS

Precise lamination using high quality Biaxial and UD fiberglass layers to provide the ultimate balance of flex, response and strength.

A-GRADE 316 STAINLESS STEEL INSERTS

Highest quality 316 Stainless Steel inserts embedded into ABS blocks. This insert construction offers superior strength for powered riding and using boots.

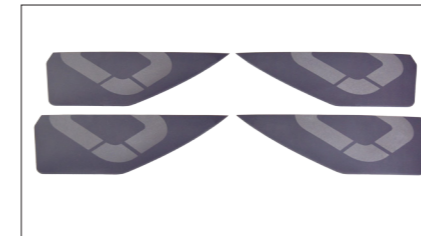

GRAB RECESS

Grab Recesses on both rails if riding without a handle.

BOARD HANDLE V2

Strong and durable with a textured underside grip for maximum control during water starts to board offs.

FINS V2

Two fin designs offer the choice for solid edge hold or increased freedom. Choose the 45mm size for maximum grip while edging and taking off to boost. The 35mm size is perfect for freestyle riders using boots and for those looking for increased freedom while carving. Our V2 fins are precisely injection molded using advanced glass-filled nylon materials for high strength and wear resistance.

FOOTPADS AND STRAPS V2

Having comfortable footpads and straps can be the difference between a good session and a bad one. Our V2 design provides the ultimate balance between performance and comfort to keep the good sessions rolling!

Our foot straps are ergonomically designed featuring Ultralon Performance Foam® and plush neoprene for the ultimate in comfort and control while providing a precise fit. Ultralon foam has an exceptional resistance to packing out, it doesn't compress over time and has an outstanding formability enabling anatomical adaptation. Combined with the quick and easy velcro size adjustment, the strap provides a snug fit to all foot shapes and sizes or wetsuit booties.

We have designed our footpads to provide superior comfort, adaptability and strength. The multi-density foam pads combine a shock absorption base layer and a higher density top layer with precise contouring and texture for increased traction to keep your feet comfortably locked in. The baseplate is built strong with nine strap positions and five stance angle options allowing for uncompromised adaptability.
